What Tools Do Shark Scientists Use?

In the *Science of Sharks* exhibit (Lower Level of the West Wing, below the shark and ray touch tank), watch the four videos about tools that shark scientists use. In the spaces below, take some notes on the tools—what they look like, how they work, and what kind of information scientists can get from them.

Tool 1	Tool 2
Tool 3	Tool 4

When you get home, design an experiment.

What do you want to know about sharks? Would you use one or more of the tools you learned about?

Question you are trying to answer:

What tool(s) would you use?

What would you expect to discover? Why do you think this?
