Your name _____

Habitat Aquarium Scavenger Hunt

Every animal needs a place to live, and different animals need different types of places — different habitats. In the Aquarium our exhibits show habitats from all over the world.

Can you find three different habitats in the Aquarium? Draw each habitat, and try to answer the questions.

Name of habitat #1

Animals that live in this habitat:

Where in the world would you find this habitat?

Draw habitat #1 here

Name of habitat #2

Animals that live in this habitat:

Where in the world would you find this habitat?

Draw habitat #2 here

Name of habitat #3

Animals that live in this habitat:

Where in the world would you find this habitat?

Draw habitat #3 here

Habitat Aquarium Scavenger Hunt - Applying the Concepts

After your field trip, use the completed scavenger hunt as a basis for discussion.

- How many different habitats did students find and draw?
- From what parts of the world did the habitats and animals come?
