Adaptations and Survival

Animals have adaptations that help them to survive in their habitat. An adaptation is something an animal is born with—a structure, a behavior, a color or some other feature—that makes that animal well-suited to where it lives. Choose an exhibit that you want to focus on. Then, on the reverse of this page, choose one animal in that exhibit.

Exhibit name:

Draw and label the habitat

Animal Name (scientific or common):

Draw the animal. Label details.

In each circle, draw one *physical adaptation* the animal has *or* describe one *behavior* the animal does.

Write one sentence to describe how each adaptation helps the animal to survive:

Adaptation 1:
Adaptation 2:
Adaptation 3:

Write one question you have about the animal:
