- Colored pencils (optional)

Follow One Animal

Choose one animal in any exhibit. Watch that animal to get a sense of what kinds of movements it makes. Every time it changes position, draw or describe its new position in a different box below.

Hint: Choose an exhibit where you can see the animals all the time. The Giant Ocean Tank is probably not a great choice for this activity. Choose an animal that moves around.

Extension: Combine with the Secret Animal activity for an extra challenge.

Animal Name (scientific or common):

Exhibit Name:

Draw or describe the animal's positions
