- Pencil
- Colored pencils (optional)
- Bony Fish Guide (optional)

Fish Mouths—What do they tell us?

Taking a close look at just one adaptation of an animal (tail, eyes, etc.) can tell us a lot about differences between animals. A mouth is a mouth, right? Not if you look closely. Choose an exhibit with a lot of different kinds of fish. Look closely at their mouths. What do you think this fish eats, with a mouth like that?

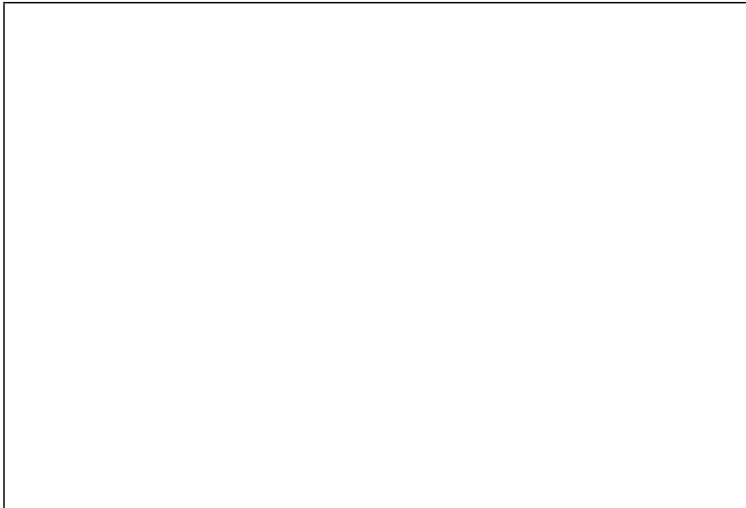

Exhibit name:

Describe this habitat:

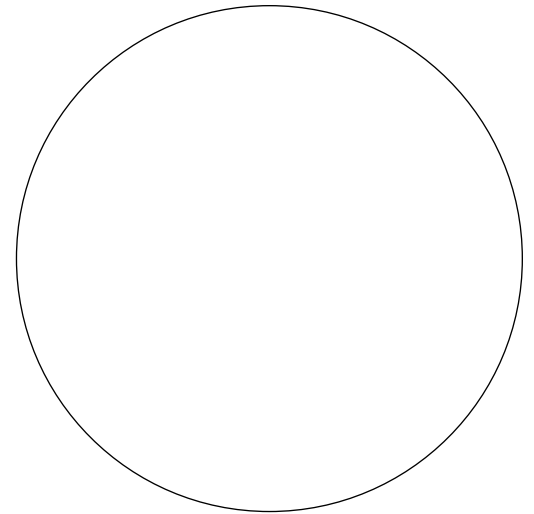

FISH #1

Choose a fish. Write the name of the fish: _____

Draw the fish, label the colors:

Draw just the MOUTH:

List behaviors of this fish:

List anything else you observe about this fish:

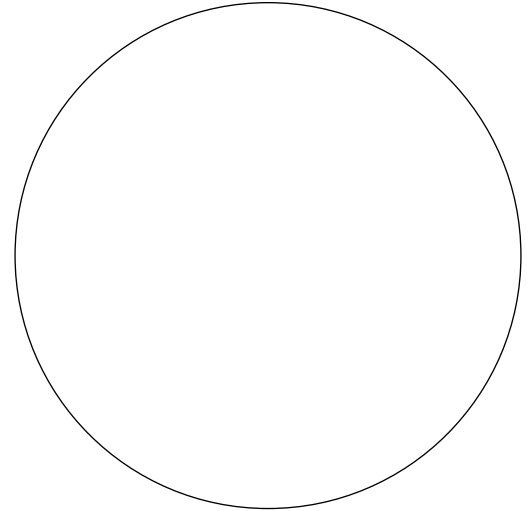

FISH #2

Choose a fish. Write the name of the fish: _____

Draw the fish, label the colors:

Draw just the MOUTH:

List behaviors of this fish:

List anything else you observe about this fish:

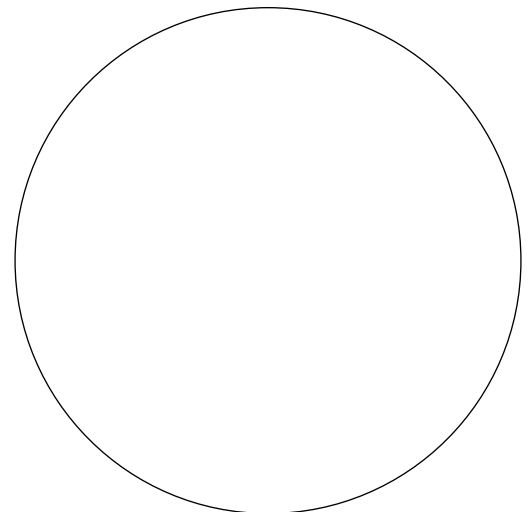

FISH #3

Choose a fish. Write the name of the fish: _____

Draw the fish, label the colors:

Draw just the MOUTH:

List behaviors of this fish:

List anything else you observe about this fish:
